# LONTREL™ 100 SL

HERBICIDE

Reg. No./Nr. L4919 Act/Wet 36/1947

A SYSTEMIC WATER SOLUBLE LIQUID 'N SISTEMIESE WATEROPLOSbare HERBICIDE FOR THE SUPPRESSION OF VLOEISTOF ONKRUIDDODER VIR DIE ACACIA sp. IN PINE AND EUCALYPTUS ONDERDRUKKING VAN ACACIA sp. IN PLANTATIONS AND FOR POST- DENNE- EN EUCALYPTUS PLANTASIES EMERGENCE CONTROL OF ANNUAL EN VIR DIE NA-OPKOMS BEHEER VAN BROADLEAF WEEDS, AS LISTED, IN EENJARIGE BREëBLARE, SOOS CANOLA.

HRAC: HERBICIDE GROUP CODE O

HRAC: ONKRUIDDODERGROEPKODE

## Active Ingredient/Aktiewe Bestanddeel

Clopyralid (pyridine compound) ..... 100 g/λ ..... Klopiralied (piridien verbinding)

NET VOLUME ..... λ ..... NETTO VOLUME

## REGISTRATION HOLDER / REGISTRASIEHOUER

DOW AGROSCIENCES SOUTHERN AFRICA (PTY) LTD / (EDMS) BPK

REG NO 1967/007147/07

PRIVATE BAG X 160 PRIVAATSAK

BRYANSTON 2021

Lontrel\* 100 SL/2006-08-22

CAUTION  
VERSIGTIG

## **WARNINGS**

Poisonous by swallowing.

Concentrate may cause irritation to eyes and skin.

Store in a cool place.

Store away from food, feed, seed and other agricultural chemicals and out of reach of children, uninformed persons and animals.

In case of poisoning, call a doctor and show him/her this label.

**RE-ENTRY INTERVAL:** Do not enter treated area until spray deposit has dried unless wearing protective clothing.

**Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions; quality of dilution water; compatibility with other substances not indicated on the label and the occurrence of resistance of weeds against the remedy concerned as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.**

## **PRECAUTIONS**

Wear protective gloves, goggles and clothing when handling the concentrate.

Do not breathe fumes or spray mist.

Wash contaminated clothing daily.

Wash with soap and water after accidental skin contact. Avoid eye contact. In case of eye contact, flush eyes with clean water.

Do not eat, drink or smoke whilst applying, mixing or before washing hands and face and change of clothing.

Prevent drift onto other crops, grazing, rivers, dams or areas not under treatment.

Clean applicator before using with other material - dispose of wash water where it will not contaminate food, grazing, rivers or dams.

Rinse empty container three times with a volume of water equal to a minimum of 10 % of that of the container. Add the rinsings to the contents of the spray tank before destroying the container by perforation and flattening and NEVER use for any other purpose.

Prevent contamination of food, feeds, drinking water and eating utensils.

## DIRECTIONS FOR USE

**Use only as directed**

### COMPATIBILITY

The compatibility of **LONTREL\* 100 SL** with chemicals, other than those recommended, is not known and their usage together with **LONTREL\* 100 SL** should be avoided.

### MIXING

Half fill the spray tank with water and add the required volume of **LONTREL\* 100 SL**. While filling the spray tank add surfactant at the rate indicated below while maintaining agitation.

### APPLICATION

#### FOLIAR APPLICATION

##### (a) In Forestry

- **Use only on actively growing Acacias with full leaf cover**
- **LONTREL\* 100 SL** application may be made over eucalyptus and pines.
- **LONTREL\* 100 SL + TIMBREL\* 360 SL** application can only be used in pines.
- Apply as an even cover spray to leaves and stems of Acacias.
- Do not apply to Acacias higher than 0,5 metres.
- Do not spray if rain is likely within three hours.
- Do not spray when Acacia leaves are wet as a result of rain or dew.
- Avoid spray drift onto non-target plants. At registered rates, **LONTREL\* 100 SL** will not control or harm grasses.
- Use a knapsack sprayer or tractor sprayer with flat fan nozzles (eg. Lumark 04-F80 or equivalent type) that will ensure even coverage of the target area. Maintain a constant pressure of between 250 - 300 kPa.

##### (b) In Canola

- Apply by tractor with boom and nozzles in sufficient water (150 – 250 litres/ha) to ensure good coverage of the susceptible seedling broadleaf weeds
- Do not spray if rain is likely within three hours.
- Do not spray when weeds are wet as a result of rain or dew.
- Avoid spray drift onto non-target plants. At registered rates, **LONTREL\* 100 SL** will not control or harm grasses.

## MODE OF ACTION

While some Acacia plants may be killed, the majority will only be suppressed. This suppression will cause Acacias to remain stunted due to cessation of cell division and therefore growth, become yellowish, suffer leaf loss and lack of vigor. As such they present minimal or no competition to the crop trees. Some re-growth may occur.

## RATE AND METHOD OF APPLICATION

### A. FORESTRY

**NOTE:** Actipron\*\* Super should be added at a rate of 500 mλ per 100 litres spray mix.

## WAARSKUWINGS

Giftig indien ingesluk word.

Konsentraat mag irritasie van vel en oë veroorsaak.

Bêre in 'n koel plek.

Bêre weg van voedsel, voer, saad en ander landboumiddels en buite die bereik van kinders, oningesigte persone en diere.

In geval van vergiftiging ontbied 'n geneesheer en toon hierdie etiket aan hom/haar.

**HERBETREDING:** Moet nie behandelde gebied betree alvorens die sputneerslag droog is nie, tensy beskermende oorklere gedra word.

**Alhoewel hierdie middel omvattend onder 'n groot verskeidenheid toestande getoets is, waarborg die registrasiehouer nie dat dit onder alle toestande doeltreffend sal wees nie, aangesien die werking en effek daarvan beïnvloed kan word deur faktore soos abnormale klimaats- en bergingstoestande; kwaliteit van verdunningswater; verenigbaarheid met ander stowwe wat nie op die etiket aangedui is nie en die voorkoms van weerstand van die onkruid teen die betrokke middel sowel as die metode, tyd en akkuraatheid van toediening. Verder aanvaar die registrasiehouer nie verantwoordelikheid vir skade aan gewasse, plantegroei, die omgewing of vir nadelige effek op mens of dier of vir 'n gebrek aan prestasie van die betrokke middel as gevolg van die versuim van die gebruiker om etiketaanwysings na te kom of as gevolg van die ontstaan van toestande wat nie kragtens die registrasie voorsien kon word nie. Raadpleeg die verskaffer in die geval van enige onsekerheid.**

## VOORSORGMAATREËLS

Dra beskermende handskoene, bril en klere wanneer die konsentraat hanteer word.

Moenie dampe of sputnewel inasem nie.

Was besoedelde klere daagliks.

Was onmiddellik met seep en water indien per ongeluk met die vel in aanraking kom. Vermy aanraking met die oë. In geval van oogkontak, spoel oë met skoon water.

Moenie eet, drink of rook tydens vermenging en toediening en alvorens hande en gesig gewas en skoon klere aangetrek is nie.

Verhoed sputstofwegdrywing na ander gewasse, weidings, riviere, damme of enige gebied wat nie behandel word nie.

Om beskadiging van gewenste plante te voorkom moet houers en sputtoerusting wat gebruik is, deeglik skoongemaak word voor toediening van ander middels op sulke plante. Gooi was- en spoelwater uit waar dit nie gewasse, weiding, riviere en damme sal besoedel nie.

Spoel leë houer driekeer uit met 'n volume water gelykstaande aan 'n minimum van 10 % van die houer. Gooi die spoelwater by die inhoud van die sputtenk voordat die houer vernietig word deur gate daarin te maak en dit plat te druk en moet nie vir enige ander doel gebruik nie.

Voorkom besoedeling van voedselware, voer, drinkwater en eetgerei.

## GEBRUIKSAANWYSINGS

Gebruik slegs soos aangedui

### VERENIGBAARHEID

Die verenigbaarheid van **LONTREL\* 100 SL** met ander middels, benewens die aangedui is onbekend en die gebruik daarvan saam met LONTREL\* 100 SL moet vermy word.

### VERMENGING

Vul die spuittenk half vol met water en voeg die benodigde volume **LONTREL\* 100 SL** by. Terwyl die spuittenk dan verder met water gevul word voeg die benatter by teen die dosis onder aangedui terwyl roering plaasvind.

### TOEDIENING

#### LOOFTOEDIENING

##### (a) In Bosbou

- **Wend slegs aan wanneer aktiefgroeiende Akasias 'n volle drag blare het**
- **LONTREL\* 100 SL** toediening mag oor eucalyptus- en dennebome geskied.
- **LONTREL\* 100 SL + TIMBREL\* 360 SL** toediening mag net in dennebome geskied.
- Dien toe as 'n volledige dekbespuiting op blare en stamme van Akasias.
- Moet nie op Akasias hoër as 0,5 meter toegedien word nie.
- Moet nie toegedien word indien reën binne drie ure waarskynlik is nie.
- Moet nie toegedien word wanneer Akasiablare nat as gevolg van reën of dou is nie.
- Verhoed spuitstofwegdrywing na gewenste plante. Teen geregistreerde dosisse sal **LONTREL\* 100 SL** nie grasse beskadig nie.
- Gebruik 'n rugsak- of trekkerspuit wat toegerus is met platwaaier tipe spuitstukke (bv. Lumark 04-F80 of soortgelyke spuitstukke) wat egalige benetting sal verseker. Handhaaf 'n konstante druk van 250 - 300 kPa.

##### (b) In Kanola

- Dien toe met 'n trekker en spuitbalk in genoeg water (150-250 liter water/ha) om 'n goeie bedekking van die vatbare breëblaar onkruid te verseker.
- Moet nie toegedien word indien reën binne drie ure waarskynlik is nie.
- Moet nie toegedien word wanneer onkruid nat as gevolg van reën of dou is nie.
- Verhoed spuitstofwegdrywing na gewenste plante. Teen geregistreerde dosisse sal **LONTREL\* 100 SL** nie grasse beskadig nie.

## WYSE VAN WERKING

Sekere van die Akasias sal sterf maar die meerderheid sal slegs onderdruk word. Hierdie onderdrukking veroorsaak dat die akasias kort bly as gevolg van staking van selverdeling en dus groei, vergeel, blare verloor en nie lewenskragtig is nie. Dit veroorsaak dat hulle minimaal of geen kompetisie vir die gewasbome sal wees nie. 'n Mate van hergroei mag plaasvind.

## TOEDIENINGSHOEVEELHEDE EN -METODE VAN TOEDIENING

### A. BOSBOU

**NOTA:** Actipron\*\*Super moet bygevoeg word teen 500 mλ per 100 liter spuitmengsel
