THE WATER RESERVOIR

AquaFix Ultra is a polyacrylic crosslink homopolymer inert substance, used to absorb water as a reservoir for the plant root zone, for use in agriculture, horticulture and forestry.

AQUAFIX ULTRA DOES NOT CONTAIN POLYACRYLAMIDE.

DIRECTIONS FOR USE: Use only as directed

Application Rate – Forestry:

Apply 3 grams of AquaFix Ultra per seedling.

OR

AquaFix Ultra may be applied as a slurry in approximately 500 ml of water. Mix rate of 1kg per 200 l

Once a slurry is formed pour slurry into planting pit and mix into soil. Place seedling into pit and close up as per normal planting procedures.

OR

Pour slurry into planting pit, place seedling into slurry without mixing into the soil and plant as per normal planting procedures.

Application Rate:

Broadcast

– apply 50 – 100 g/ m²

Hydroseedlings

– apply 20 – 30 g/ m³

WARNINGS:

Do not inhale dust or take product internally. Spilled material causes slippery ground when wet. Store under dry conditions and below a temperature of 35 degrees Celsius.

NET WEIGHT

10KG

- Water and nutrient reservoir
- Improves germination
- Improves aeration
- Reduces leaching
